Subject: Microsoft Settlement

Dear Judge,

I have been informed of the conduct that microsoft has taken part in regarding the pfj and I am strongly opposed by it. Microsoft should no longer be given the opportunity to be a monopoly either in the government's eyes or the general public who consumes this type of technology. If Microsoft is allowed to eliminate all other competition then the market for the specific type of technology can only expand and grow at a minimal rate, leaving no room for competition for lower prices, better software and incentives for a variety of programs that can offer different services, these are all disadvantages that the consumer, referring to myself as one of them, will have to face. Please strongly consider this while making your decision.

By allowing Microsoft to continue to dominate this specific technological field, the consumer misses out on so many benefits. Thank you for your time.
